

A building-integrated photovoltaic (BIPV) facade system designed to harness the power of the sun, stand up to the harshest of climates, and bring unparalleled design flexibility to your building.

Building Integrated Photovoltaics (BIPV) shall be defined as a photovoltaic generating component which forms an integral and essential part of a permanent building structure without which a ...

Metsolar produces unlimited variety of tailored BIPV solar panels for UAE, that are efficient, cost competitive and have exclusive design possibilities. Our agile manufacturing provides flexibility ...

OverviewHistoryFormsTransparent and translucent photovoltaicsGovernment subsidiesOther integrated photovoltaicsChallengesSee alsoBuilding-integrated photovoltaics (BIPV) are photovoltaic materials that are used to replace conventional building materials in parts of the building envelope such as the roof, skylights, or façades. They are increasingly being incorporated into the construction of new buildings as a principal or ancillary source of electrical power, although existing buildings may be retrofitted with similar technology. T...
