What is balcony solar?

"Balcony Solar" or "Balkonkraftwerk" is fairly new in Europe, but is growing rapidly. In Germany, a monumental electrical code change now allows up to 800 watts of solar power to be easily grid-tied using a normal household outlet in combination with certain equipment, requiring a permit but no electrician.

Does a balcony power plant have a battery storage system?

Some balcony power plants may also incorporate a battery storage system, such as Anker SOLIX Balcony Solar System (890W) withStorage (1600Wh) and Balcony Brackets. This allows excess electricity generated during the day to be stored in batteries for use during periods of low sunlight or at night when solar generation is not active.

Is balcony solar off-grid?

If you want to brag about your new "Balcony Solar" install, it's true that any device connected to the power station is "off-grid". If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!

Is balcony solar reshaping the solar industry?

This change has exploded adoption and is reshaping the industry. In the United States, off-grid "Balcony Solar" systems are allowed but grid-tied "Balcony Solar" is not allowed by the US electrical code because back-fed outlets are prohibited -- except for in Utah (March 2025)!
