

# Burundi invests in energy storage power station

Why should Burundi invest in a large-scale energy infrastructure?

Located in Bururi province, this large-scale infrastructure marks a key step forward in the country's pursuit of energy self-sufficiency. It is also a strong signal for an investment-friendly climate to ensure more inclusive and sustainable economic development for Burundi.

# Why did Burundi start a Jiji power plant?

The Jiji plant, with a capacity of 32.5 MW, began operations, hence the commissioning. This development aligns with Burundi's National Energy Compact under the Mission 300 initiative, a World Bank and AfDB program targeting electricity access for 300 million Africans by 2030.

### Why is Jiji hydroelectric power plant important in Burundi?

Hawa Cissé Wagué, World Bank Resident Representative in Burundi, noted, "The Jiji hydroelectric power plant and the lines and substations built as part of the project are not infrastructure like any other. This infrastructure helps ensure Burundi's economic and social development.

# Who inaugurated Burundi's new power plant?

Burundi's President É variste Ndayishimiyeinaugurated the power plant, marking the first phase of the \$320 million Power Project.

### Who funded the Burundi hydropower project?

The project is funded by the European Investment Bank (EIB), African Development Bank (AfDB), World Bank, and the European Union. It includes two hydropower plants--Jiji and Mulembwe--built on small rivers in Burundi's Bururi Province.

### How much does it cost to build a new plant in Burundi?

The construction of these two plants at a total cost of \$320 millionwas made possible thanks to strong cooperation between the Burundi government and the development partners - the African Development Bank (AfDB), the European Investment Bank (EIB), the World Bank (WB) and the European Union (EU).
