

Chilean Island Solar Power Generation Home Franchise

Why is solar power important in Chile?

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 11.05 GW in 2023. In 2024, Solar energy provided 19.92 TWh of electricity generation in Chile, accounting for 22.3% of total national electricity grid generation, compared to less than 0.1% in 2013.

How much does a solar power plant cost in Chile?

Because of its good solar resource several international companies have bid record low prices for solar thermal power plants in Chile, including the Copiapó Solar Project bid at \$63/MWh by Solar Reserve in 2017. If realized this would have been the lowest ever price for a CSP project in the world.

How many MW does SolarPack have in Chile?

With that, Solarpack raised its total operating capacity in Chile at the time to 181 MW. In 2013 the Atacama 1 solar complex was proposed as a 110 MW solar thermal electric plant (the first in Latin America) and a 100 MW photovoltaic plant. The solar thermal plant will include 17.5 hours of thermal storage.

When did SolarPack start supplying power to Chile?

In March 2020 PV Magazine reported that Solarpack had begun providing power on 2 March 2020, to the Chilean grid from its 123 MW Granja project, 10 months ahead of the contracted date of 1 January 2021. With that, Solarpack raised its total operating capacity in Chile at the time to 181 MW.

Central Chile, home to Santiago and Valparaíso, is a demand sink rather than a generation hub. Local projects emphasize rooftop and distributed solar to circumvent land-use ...
