

Cook Islands inverter conversion to 12v

Do you need a 12 volt inverter?

Inverters are cool devices that turn 12 volt battery power into 110V or 220V AC power. Do you own an RV? Read our post on converters, inverters and inverter chargers [Do You Need A 12V Inverter?](#) Inverters are common for camper conversions but they are not necessary for every build.

Should I use a 1200 watt inverter for a 12V DC system?

This means that for 12V DC systems, you generally shouldn't be using larger than a 1200 Watt inverter. These are safety recommendations that we are passing on from electrical forums, not hard rules. AC wiring is much more efficient than low voltage DC.

What is the difference between a 100W & 12V inverter?

This 100W pure sine inverter has a peak surge of 2000W along with a continuous 1000W of power. The 12v inverter has a digital display that indicates battery capacity, output voltage and DC indicator. All of these things give you practical information for running your electronic system in the most efficient way possible.

What are the different types of inverters?

There are two main types of inverters- MSW and PSW. Alternating current travels in waves that "alternate" from (+) to (-). This is different from how direct current power travels through circuits. These two inverter types describe how DC power is converted into AC power. A picture makes this easier:

Do you need an inverter for a camper conversion?

Inverters are common for camper conversions but they are not necessary for every build. If you can get away with powering everything straight from a DC battery, then skip the inefficiency and save some money. For those trying to cook with an induction burner or run a high powered laptop, you might not have a choice.

How many watts a DC inverter should I use?

One final point: A general rule of thumb for DC systems is to not put more than 100A through basic wiring. This means that for 12V DC systems, you generally shouldn't be using larger than a 1200 Watt inverter. These are safety recommendations that we are passing on from electrical forums, not hard rules.
