## **Dual-group lithium battery module**

#### What is a lithium-ion battery module?

A lithium-ion battery module is a group of interconnected battery cells that work together to provide a higher level of voltage and capacity. Modules are designed to facilitate efficient cooling and thermal management, ensuring that the temperature within the battery remains within safe operating limits.

#### What is a modular lithium-ion battery?

Modular lithium-ion batteries represent a flexible approach to energy storage, allowing for scalability and adaptability in various applications. A modular battery system consists of interchangeable and stackable components, which can be configured to meet specific power and energy demands.

#### What is a battery module?

A battery module is a system composed of a certain number of cells in a designed series and parallel structure as needed. By connecting the cells in series, the voltages of multiple cells are accumulated, thereby achieving an output voltage based on a corresponding multiple of the cell voltage.

#### What is a lithium-ion battery pack?

A lithium-ion battery pack is the largest and most complex assembly in the hierarchy of battery systems. It consists of multiple modules arranged in a specific configuration to meet the voltage and energy requirements of a particular application.

### What is the structure of a lithium battery?

The general structure of lithium batteries is a cell,battery module and battery pack. Battery cell technology is the cornerstone of battery systems. The process of assembling lithium battery cells into groups is called PACK,which can be a single battery or a battery module connected in series and parallel.

#### What is a modular battery pack?

A modular battery pack takes the concept of modularity to the next level by incorporating interchangeable and stackable battery modules. Each module contains a set number of battery cells, and these modules can be added or removed as needed to adjust the pack's capacity or voltage.

Additionally, the Lithion Battery product line can easily be scaled to accommodate a variety of applications - from 12 to 1000 volts using a large lithium ion battery pack. Similarly, this ...

Jingsun New Energy And Technology Co.,Ltd: Find professional solar panel, lead acid battery, lithium battery, solar power system, charge controller manufacturers and suppliers in China ...

The Hexonix 18650 Charging Module with LED Display is a multifunctional power management board designed for DIY power bank and portable charging applications. It supports Type-C ...
