

## How to get telecom operators to install base stations and run them

What is a base station in a mobile network?

The base stations represent the radio part of the mobile network, and one base station typically contains multiple cells which operate on specific radio frequencies. The radio network is what connects a mobile phone to the mobile network.

#### What is a base station called?

In 2G GSM networks, the base station is called Base Transceiver Station. The base station is called Node B in UMTS networks, eNodeB in LTE networks, and gNodeB in 5G networks. The cell sites and base stations are owned by mobile network operators such as Vodafone, T-Mobile, Rogers, AT&T, Verizon etc.

#### Who owns cell sites & base stations?

The cell sites and base stations are owned by mobile network operators such as Vodafone, T-Mobile, Rogers, AT&T, Verizon etc. The base stations represent the radio part of the mobile network, and one base station typically contains multiple cells which operate on specific radio frequencies.

## Can a telco install a mobile phone base station?

All mobile phone base stations must stay within the safe limits of electromagnetic energy (EME). Telcos can only install a mobile phone base station if they can show it will stay in the safe limits. A telco can install a temporary base station to either: minimise service disruption during the maintenance or replacement of an existing facility.

#### What can you do with a base station?

There's plenty of fun things you could achieve with such a base station: reverse-engineering of proprietary technology, security research, and probing for vulnerabilities through WWAN interfaces rarely considered as an attack surface. Maybe you could even set up your own cell network -- if you ever go sailing in neutral waters, that is.

## Who approves a mobile phone base station?

There are rules telcos must follow to install mobile phone base stations. The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land. To find out if a base station requires approval under local government, state or territory planning law, please contact your local council.

New Delhi, Dec 16 (PTI) Telecom operators are installing on an average 2,500 base stations per week for providing 5G services in the country, Union minister Devusinh Chauhan said on Friday.

A cell site is a location or "site" where a mobile network operator installs a 2G, 3G, 4G or 5G radio base
