

Japanese communication base station wind turbine tower

Ericsson was selected by the Japanese communications service provider KDDI as a partner for Japan's first vault 5G base stations. The company will support KDDI in deploying ...

JTower has developed a glass antenna that it claims can "turn windows into base stations," to deliver 5G services in Tokyo, Japan. The Japanese telecom infrastructure ...

This collaboration aims to revolutionise urban connectivity by deploying "manhole-shaped" base stations with sub-terrain antennas, offering an innovative solution for urban ...

SoftBank has successfully trialed using a blimp as a floating cell-tower base station, using an antenna developed for high altitude platforms. SoftBank Corp. this week ...

The idea is to save precious space in Japan's crowded cities to installing 5G base stations in "manhole-shaped" vaults. Power infrastructure would remain below ground with ...

The innovative Ericsson solution enables 5G base station antennas to be installed underground, saving space and facilitating the use of existing assets, such as optical fiber and ...

The core mission of the rooftop tower base station is to expand signal coverage. In the vast and remote mountainous areas with complex terrain and dispersed populations, traditional ground ...

The authors investigate the use of wind-turbine-mounted base stations as a cost-efective solution for regions with high wind energy potential, since it could replace or even outperform current ...

Ericsson said its sub-terrain antennas can provide connectivity in confined spaces such as manholes where fiber and power exist and where the installation of standard sites is ...

We investigate the use of wind turbine-mounted base stations (WTBSs) as a cost-effective solution for regions with high wind energy potential, since it could replace or even outperform ...

This study proposes an application of vertical-axis wind turbines to power telecom towers in off-grid areas. Telecom services play a critical role in a country, and the majority of the people use ...
