## Jordan outdoor power requirements

Do I need a power adapter in Jordan?

The standard voltage in Jordan is 230V, and the frequency is 50Hz. Devices from countries with different voltage standards, like the United States (120V), may require a voltage converter in addition to a plug adapter. Do You Need a Power Adapter in Jordan? Whether you'll need a power adapter depends on the type of plug your devices use.

What type of power plugs are used in Jordan?

In Jordan,power plugs and sockets (outlets) of type C,type D,type F,type G and type Jare used. The standard voltage is 230 V at a frequency of 50 Hz. For more information,select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon,where you will find a great selection of travel adapters.

What is the standard voltage of a power socket in Jordan?

In Jordan, the standard voltage is 230 Vat a frequency of 50 Hz. The power sockets in Jordan are of type C,D,F,G and J. The standard voltage is 230 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Jordan.

Do I need a voltage converter in Jordan?

Since Jordan uses Type C,D,F,and G outlets,you'll need a Type A/B to Type C/D/F/G adapter. Additionally,as the voltage in North America is different,you may also need a voltage converter for devices that are not dual-voltage. Ensure your devices are ready as you explore the vibrant streets of Amman or the historic sites of Petra.

Do I need a Jordan plug adapter?

Jordan Plug Types (Yes Types) If you are planning a trip to Jordan, you will need to remember to pack a travel power adapter so that you can use your usual devices that require power or charging. Yes, you will likely need a Jordan plug adapter if you are not from the European Union. I get asked this question all the time!

Do 230V plugs work in Jordan?

The United Kingdom uses the type G three-prong 230V plug. You will find some type G sockets in Jordan but it just depends on who did the electrical work. Do American plugs work in Jordan? No, you will not be able to use type A and type B (the typical 2 and three-prong plugs used in North America) in Jordan.

Jordan uses a standard voltage of 230 volts and a frequency of 50 Hertz. If your devices are designed to operate on 230 volts and 50 Hertz, you will not need a voltage converter.

No, you will not be able to use type A and type B (the typical 2 and three-prong plugs used in North America) in Jordan. You will need to get an adapter for Jordan like this one.
