Latvian Industrial Energy Storage Device

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Why do we need a battery system in Latvia?

The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply. The batteries will work as modern accumulators for storing large volumes of energy, which will be important for ensuring energy balance once the Latvian electricity supply grid works in sync with the European grid."

Does Latvia need a Russian-controlled grid?

The disconnection of the Latvian energy supply system from the Russian-controlled grid is a key condition for achieving Latvia's energy independence and security of energy supply.

Are new wind farms a good investment for Latvia's energy security?

I am pleased that the bar has been set high for developers of new wind farms, which also plays an important role in the context of Latvia's energy security," said Climate and Energy Minister of Latvia, Kaspars Melnis. Given the total investment in the project, the OP Corporate Bank provided loan financing.

How will Latvenergo improve the security of supply?

The innovations and infrastructure of Latvenergo will not only strengthen the security of supply but also the development of the Baltic region." BESS, or Battery Energy Storage System, is a technology that allows electricity to be stored with the objective of feeding it back into the grid at times of peak demand.

Why are battery systems important for Latvenergo?

Battery systems play a crucial role in balancing the production volumes of Latvenergo and improving the flexibility of consumption. Chief Financial Officer of Latvenergo Guntars Balcuns: "This investment in battery systems is an important step in the development of our energy sector and long-term sustainability.

Latvian energy storage projects are gaining momentum as the country accelerates its transition to renewable energy. This article explores key players, emerging technologies, and market ...

Amid the Baltic region"s stringent grid stability requirements, Kehua"s C& I liquid-cooled S³-EStore systems have been deployed at a Latvian industrial facility, ensuring uninterrupted ...

All equipment will be provided by Rolls-Royce Power Systems, one of the world"s best-known manufacturers of energy storage systems. Dr Jörg Stratmann, CEO of Rolls-Royce Power ...
