How has Mozambique improved electricity access?

The recently completed Mozambique Energy for All Project, along with the ongoing Sustainable Energy and Broadband Access in Rural Mozambique Project, have significantly contributed to expanding electricity access. To date, these projects have enabled over 2.6 million Mozambicans to connect to the national grid. ASCENT will build on these efforts.

What is the optimal power system expansion plan for Mozambique?

The optimal power system expansion plan if wind and solar capacity are allowed to triple to reach almost 3 GW by 2032. Currently,the power system of Mozambique is separated into two transmission networks isolated from one another: the Central-Northern and Southern systems. Over 50% of the annual power demand is seen in the Southern system.

### What is EDM doing in Mozambique?

EDM and Mozambique support the development of renewable energy projects, having launched public tenders for solar and wind projects, the country is also exploring battery storage solutions. The largest power generation plant in the country is the Cahora Bassa hydro dam, operated by the government owned Hidroelé ctrica de Cahora Bassa (HCB).

### How can Mozambique achieve its electrification goal?

A power mix that takes advantage of its vast energy resources in a cost-effective way and provides a solid foundation for the long-term development of its power system. The use of proven power generation technologies coupled with a well-structured and realistic data-driven plan will enable Mozambique to reach its electrification goal.

#### When did independent power projects start in Mozambique?

The first Independent Power Projects (IPPs) in Mozambique came online in 2015. These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing.

#### Can Mozambique achieve universal energy access?

These efforts will significantly advance the Government of Mozambique's goal of achieving universal energy access," said Luc Lecuit, Interim Division Director for Mozambique, Madagascar, Mauritius, Comoros and Seychelles, and Operations Manager for the World Bank in Mozambique.

This project aims to provide new electricity access to nearly one million people, offer better cooking solutions to 90,000 individuals, and connect 68 schools, clinics, and other public ...
