

Outdoor Power Supply Peripherals

Do you need extension cables for a power strip?

A power strip with long cord length can eliminate the need for outside extension cables, though they can be cumbersome if the extra length isn't required. A shorter cord is ideal if the outdoor power strip is set up close to the outdoor outlet. The best portable power stations eliminate the need for cords entirely.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Are outdoor power strips weather resistant?

Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.

Can a Loitinsy power strip be used outside?

There are also small mounting brackets on the four corners of the power strip's housing, which give you the option of mounting it to an exterior wall if you plan to use it outdoors over the long term. The Loitinsy power strip's outlets worked well, including all three USB outlets, after splashing the power strip with water.

Are outdoor power strips Wi-Fi Ready?

Some outdoor power strips are Wi-Fi ready, allowing them to connect to your home network. These smart power strips can be controlled via a smartphone app, which is ideal for turning on and off holiday lighting displays.

Are EIGSO power strips weatherproof?

EIGSO's weatherproof outdoor power strip is one of the most affordable models that still offers a high degree of weather resistance. With its IPX6 rating, it can withstand continuous rainfall thanks to drainage holes on the back of the power strip that allow water that finds its way into the sockets to drain out.
