Outdoor power supply connected to host

How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

Do I need a GFCI outlet if I run power outside?

When running power outside, a GFCI-equipped outlet is required by code in all areas exposed to moisture, such as the outdoors, and ensures safety. When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI.

Is a permanent power outlet necessary?

For lighting, lawn tools used on a regular basis, or power needs for outbuildings, you need a permanent power solution for safety. This can involve an outdoor outlet addition to your home's main structure, or wiring run remotely to an outbuilding.

How do Philips outdoor lights work?

Philips hue have a large choice now of outdoor lighting options, some are wall mounted and powered via a main cable directly, while others are standalone and are connected and powered via power extension cables. With the extension cable and power supply you can link lights together to create a chain using the cable extensions and 'T' connectors.

How do I choose an outdoor outlet?

When choosing an outdoor outlet, be sure to select an outdoor-rated and weatherproof model with built-in, high-sensitivity GFCI\. All exterior outlets should have spring-loaded covers to protect them from weather, pests, and most importantly, moisture.

How do I install an outdoor outlet?

To install an outdoor outlet, find a conveniently located indoor outlet to connect to with the wiring. Drill a hole through the house wall and feed the wiring in close to the indoor outlet. Then, fit the mounting box for the outdoor outlet over that hole.
