Pay energy storage battery

How much does a battery cost on EnergySage?

When paired with a solar panel system, a typical battery will cost around \$15,000 on EnergySage. While there aren't as many ways to pay for batteries as for solar, you still have a few different options to pay for storage at your disposal, each of which has pros and cons.

How do you pay for a battery?

The most common way to pay for a battery is through an upfront, or cash, purchase. When you purchase a battery upfront, you take full advantage of any incentives and rebates, from tax credits to cash rebates to performance-based incentives. Like solar, buying your battery upfront is the best way to maximize your savings with storage.

Do you have to pay for energy storage?

But here's the good news: you don't have to shoulder the full cost yourself. Across the U.S. (and in many other countries), governments and utilities offer tax credits, rebates, and incentives to encourage homeowners to go green with energy storage systems.

How do I finance my energy storage system?

Similarly to solar, there are three primary models for financing your energy storage systems, with slight variations from what's available for solar. The most common way to pay for a battery is through an upfront, or cash, purchase.

Can you get a tax credit for a battery storage system?

In addition to the federal tax credit, several states have taken steps to help homeowners get battery storage systems with their solar installations. These incentives can be combined with the federal tax credit to reduce the total cost to own a battery down to a very manageable number.

Should I install a battery or energy storage system?

Installing an energy storage systemcan help you prepare for a PSPS or other outage types. A battery will use stored grid or solar energy to keep your home running when grid power is disconnected.
