

Photovoltaic panel roof columns and prices

Why is a solar roof more expensive than a conventional roof?

A solar roof is more expensive than covering a comparable area with solar panels. Solar tiles and shingles are less efficient than conventional solar panels, which is more of a disadvantage in locations where there are few daylight hours or where the roof does not get full sun all day.

Are rooftop solar panels a cost-effective option?

Rooftop solar panels are usually the most cost-effective option if you have a viable South, West or East facing roof with enough space to build your array.\nUse our easy solar panel calculator to get a quick estimate of how many solar panels you'll need for your home.

What is a DIY roof mount solar panel system?

DIY roof mount solar panel systems are solar panel kits designed for installation on rooftops. They make use of your home's rafters to support the weight of the solar array. Shop our selection of DIY roof mount solar panel kits for both grid-tied and off-grid properties. Roof mount systems are the standard choice for most home solar installations due to their convenience and cost-effectiveness.

What is a professional solar roof mount?

Professional Solar Products offers solar mounting structures for composition and tile roofs. The Prosolar Rooftrac PV mounting system is the "Original and Patented Top-Down Mounting System" designed to make installation cost effective and easy. IronRidge roof mounts feature their unique " Integrated Grounding System ".

What are solar panel roof mounts made of?

Made from a 100% recycled high molecular weight polyethylene(HMWPE). Solar Electric Supply carries a complete line of solar panel roof mounts for residential and commercial solar systems. All of the components we carry feature weatherproof aluminum or stainless steel components for corrosion resistance.

Are rooftop solar panels a problem?

A problem with rooftop solar is that it's heavily constrained by the characteristics of your roof. Homeowners who install ground-mounted solar panels do so for one of three reasons: Solar panels produce the most energy when they're facing south. Depending on the orientation of your house, this isn't always an option.

Install solar panels on your roof to save on racking costs and conserve valuable space on your property. Shop our selection of DIY roof mount solar panel kits for both grid-tied and off-grid ...
