

Photovoltaic solar panels installed in the Netherlands

Detailed info and reviews on 20 top Solar companies and startups in Netherlands in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

In the Netherlands - admittedly not the first country that comes to mind when thinking of solar PV - several solar PV parks have been developed over the past years and the capacity of solar ...

Solar power in the Netherlands has an installed capacity of around 23,904 megawatt (MW) of photovoltaics as of the end of 2023. Around 4,304 MW of new capacity was installed during 2023. Market research firm GlobalData projects Dutch solar PV capacity could rise to 55,000 MW (55 GW) by 2035. Longer-term projections from the Netherlands Organisation for Applied Scientific Research

Several direct support schemes are in place and together with the historical decline in solar panel prices, these have caused solar PV to grow rapidly in the Netherlands over the last ten years.
