

Photovoltaic solar panels on Greek rooftops

With over 250 sunny days annually, Greece has become a hotspot for rooftop photovoltaic panel installations. Homeowners, businesses, and even local governments are turning to solar ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electr...

The Greek Ministry of Environment and Energy issued a public call for its EUR 238 million subsidy program for rooftop photovoltaics. More than 3,500 applications have already ...
